Professional tree care, pruning, and property stewardship

Tree Pruning Proposal

Client: _____

Date: _____

Property Address: _____

Prepared By: Abundant Life Land & Tree LLC

Tree Assessment Summary

Two hackberry trees adjacent to your home were evaluated during this visit.

The primary tree has limbs directly extending over your roof. The second tree contains dead branches and areas that are within striking distance of your home and would benefit from corrective pruning.

While the first tree is the primary concern, addressing both trees at the same time will provide better protection for the home and is more economical than scheduling the work separately.

Option A: Roof Clearance Pruning

Primary Hackberry Only

This option addresses the main tree of concern by reducing limbs overhanging the residence.

- Climb and access the primary hackberry tree.
- Remove selected limbs directly overhanging the residence.
- Perform clearance pruning to reduce roof encroachment.
- Use rigging and controlled lowering as needed to protect structures and landscaping.
- Haul away and dispose of resulting debris.
- Complete final cleanup of the work area.

Investment: \$725

Option B: Whole Canopy Protection Package

Both Adjacent Hackberry Trees

This option includes all work in Option A, plus corrective pruning on the second hackberry tree to better protect the home and improve the condition of the surrounding canopy.

- Complete roof clearance pruning on the primary hackberry.
- Remove dead, broken, and declining branches from the second hackberry.
- Perform corrective pruning to improve structure and reduce future maintenance needs.
- Improve clearance from the roof where appropriate.
- Consolidate debris hauling, disposal, and cleanup into one visit.

Recommended Option: Completing both trees during the same visit provides better overall protection for the home and avoids the cost of a separate future mobilization.

Investment: \$1,150

Included With Either Option

- | | |
|--|---|
| ✓ Professional climbing access | ✓ Controlled rigging as needed |
| ✓ Debris hauling and disposal | ✓ Complete site cleanup |
| ✓ General liability insurance coverage | ✓ Work performed using best tree care practices |

Acceptance

Please select one option:

- ☐ Option A — Roof Clearance Pruning, Primary Hackberry Only: \$725
- ☐ Option B — Whole Canopy Protection Package, Both Hackberry Trees: \$1,150
