

Abundant Life Land & Tree LLC

TREE CARE • LANDSCAPE RENEWAL • PROPERTY STEWARDSHIP

Proposal for:

Melanie Rackley
13130 SW 13th St
Yukon, OK 73099

Prepared by: Christian Castillo

Date: June 01, 2026

Thank you for the opportunity to help renew the property. This proposal separates the work into clear line items so you and your husband can choose the best pace for the project. Pricing below includes a courtesy discount in appreciation for the kindness you have shown Tommie and his family.

Recommended Scope of Work

ITEM	SCOPE	PRICE
1. Remove two declining Bradford pears with metal stake inclusions	Remove two terminally declining Bradford pear trees. Work includes careful dismantling, cutting material into manageable sections, and accounting for the embedded/ingrown steel planting stakes. Final stump height will be as low as feasible, accounting for ingrown T-post stakes. Base price assumes debris is staged neatly on-site for city pickup or owner-approved pickup area.	\$975
2. Prune of five Bradford pears	Prune five Bradford pears to raise low limbs for easier mowing and improved clearance. Includes selective cuts, cleanup of small dead/rubbing material reachable within the crown-lift scope, and proper pruning cuts. Bradford pears are structurally weak; this work improves access but does not make them storm-proof.	\$585
3. Prune two ornamental fruit trees	Light structural and aesthetic pruning for two ornamental fruit trees, focusing on deadwood, crossing/rubbing branches, clearance, and shape preservation.	\$260
4. Remove wedged volunteer tree at workshop	Remove remaining dead volunteer tree material wedged between the steel building and steel pillar. Work will be performed carefully to avoid damage to the structure. Final approach may change after close inspection because the material is trapped against metal.	\$225
5. Bermuda sod repair	Prepare and re-sod approximately 8 ft × 3 ft of Bermuda. Includes light grading, soil preparation, sod installation, and starter watering guidance.	\$110
6. Circular driveway bed featuring ornamental tree: design + installation	Design and install a low-maintenance circular garden bed featuring an ornamental tree for the center of the driveway. Includes stone removal, weed clean out, native top soil amendment, organic mulch and hardy low-maintenance perimeter plant placements to suppress weeds. Includes a \$1200 materials allowance. Final price may adjust if greater material value is desired/required/selected. Garden bed maintenance is essential with any design. Rather than outright prevent weeds (not feasible), this design is made to suppress weeds and make them easier to remove.	\$2,450
7. Haul off of all debris in the above outlined work	Process and remove tree materials, logs, and stone to be dumped in an appropriate facility.	\$950

Recommended total

\$5,555

Notes & Assumptions

Site assumptions

- Pricing is based on the current visible scope and final walk-through confirmation.
- Underground utilities, irrigation, lighting, and hidden metal/concrete may affect final methods.
- Work will be performed with care around fencing, workshop structure, lawn, and driveway areas.

Payment terms

- Deposit to schedule: 50% of selected scope.
- Balance due upon substantial completion.
- Plant selections may require approval before materials purchase.
